Table: Days

Column Name	Type
day	date

day is the column with unique values for this table.

Write a solution to convert each date in `Days` into a string formatted as "`day_name, month_name day, year`".

Return the result table in **any order**.

The result format is in the following example.

Example 1:

Input:

Days table:

day
2022-04-12
2021-08-09
2020-06-26

Output:

day
Tuesday, April 12, 2022
Monday, August 9, 2021
Friday, June 26, 2020

Explanation:

Please note that the output is case-sensitive.
