

Solved 

On the  $i$ -th day, you do the following operations on the array of day  $i-1$  to produce the array of day  $i$ :

- After some days, the array does not change. Return that final array.

On the first day, the array is changed from [6,2,3,4] to [6,3,3,4].  
No more operations can be done to this array.

On the first day, the array is changed from [1,6,3,4,3,5] to [1,5,4,3,4,5].  
On the second day, the array is changed from [1,5,4,3,4,5] to [1,4,4,4,4,5].  
No more operations can be done to this array.

- `3 <= arr.length <= 100`
- `1 <= arr[i] <= 100`
